

*Let's recap from yesterday,*

*What times can you see here?*

*Tell me the digital and the analogue time*

*Hour : minutes*

*minutes **past/to** hour*

*So far we have only looked at times to the nearest 5 minutes. Today we are going to be even more accurate and tell the time to the nearest minute.*

*Let's look at this time:*

*Count in 5's to begin with, then continue counting in ones*

*Digital 2 : 18*

*Analogue 18 minutes past 2*

*Digital :*

*Analogue*

*Digital :*

*Analogue*

**Digital : 7:07**

**Analogue 7 minutes past 7**

**Digital : 10:23**

**Analogue 23 minutes past 10**

**Remember, when writing analogue times for minutes greater than 30, we count the minutes *to* the *next* hour**

**Digital :**

**Analogue**

**Digital :**

**Analogue**

**Remember, when writing analogue times for minutes greater than 30, we count the minutes *to* the *next* hour**

**Digital : 10 : 38**

**Analogue 22 minutes to 11**

**Digital : 6: 53**

**Analogue 7 minutes to 7**
