

Monday 30th March

Today we are going to start looking at geography.

<https://www.bbc.co.uk/bitesize/topics/zvsfr82/articles/znm7vk7>

Follow this link and watch the video explaining why maps are so important. Then read the information and try the quiz to test your knowledge.

Now try this video about the important lines that cover our world and how they help with locating a place.

For today's task you will need a map of the world which shows the 7 continents

- Europe
- Asia
- North America
- South America
- Antarctica
- Africa
- Oceania

The 5 oceans

- Pacific
- Atlantic
- Indian
- Southern
- Arctic

And the Equator, Tropic of Cancer and Tropic of Capricorn.

You could use an atlas, globe or use google to search for an image.

Using the blank map, label the continents and oceans and draw on the Equator and Tropics. Use colouring pencils to colour the continents different colours and don't forget the key to show what each colour represents.
