

This is the girl now in her room. What can you infer about the girl from what you can see? What are her interests, what does she like? How do you know?

If you could design your ideal room to show your personality and your interests what would it look like? What items would be included? You could draw it, describe it or even make a model of it! I would love to see pictures of these once our communication system is confirmed.

Possible answers to inference question:

Animal lover – cat in her room

Likes to travel – pictures of pyramids on wall, map on wall, boats on bed quilt.

Tidy and organised – no mess or clutter

Dreamer – hot air balloon lampshade, stars on drawers

What other clues did you find?
