Build your own town

Let's be creative, I would like you to create your own town and label all the places in French you have looked at.

You could do this on....

Paper- as a bird's eye view

Build a 3d model – use leftover packaging to create it

Minecraft – Create your own virtual French town

Have a look on the next slide for ideas

Il te faut compléter le plan de la ville.

Remember you can email me your
designs
