

Maths Day 4

Today, we are going to look at **Scale Factor** – something Year 6 have looked at in class and as part of the home learning recently.

Now, we are going to put it into the real-life context of your shop.

Below is a reminder of how scale factor works and then you are going to be asked to work out some sizes and distances using scale factors.

Follow the Power Point below and answer the few scale drawing questions at the end.

[Scale Drawing](#)

Now do this worksheet

[Reading scale worksheet](#)

Well done if you were able to complete all that.

As part of the topic work later today you will use these skills to design the floor plan for your Virtual Lockdown Shop which your customers will be able to navigate as part of a virtual tour to allow them to select the items they want.
