

Developing Addition Skills and Understanding of Money

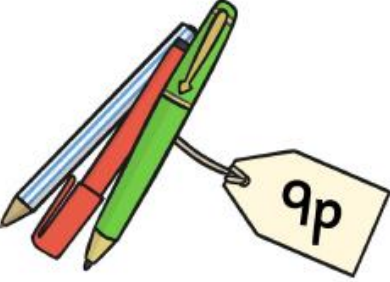

If you have some coins at home, help your child to recognise the 1p, 2p, 5p and 10p coins and explore what each one is worth.

Alternatively, use the pictures of these coins to help...

Then, challenge your child to use their understanding of coins and their addition skills to find the correct number of coins to pay for each of the toys in the pictures below. They need to match the correct set of coins to each picture. The first set is easier, involving amounts up to 10p. The second set is more difficult, involving amounts up to 20p

SET ONE

 <p>3p</p>	 <p>10p</p>	 <p>6p</p>
 <p>9p</p>	 <p>2p</p>	 <p>8p</p>

SET TWO
